

Little Lincoln's Fireside Tales

No Two Fish Are Alike

Thumbprint Fish

Make a fish as special and unique as you are! To do this project, you will need...

- A printed version of the second page of this packet
- A pair of scissors
- A variety of non-toxic paint colors
- Flat paint brushes
- Google eyes
- Non-toxic school glue
- A flat surface

Instructions

- Using a pair of scissors, cut out your printed fish image
- Next, grab a google eye (or two, if you'd like) and glue it to your fish's face. You don't have any, you can draw them.
- Then, take a paint brush and brush on one coat of paint on a finger of your choosing.
- Finally, press your coated finger firmly on where you want to paint, these fingerprints will serve as the fish's scales!

Your final product should look something like this!
